

Learn how to print plastics stronger than Aluminium and hear from the experts about affordable Metal 3D printing!

When: 9th April 2019

Where: Training 2000 Ltd, Furthergate Business Park, Harwood Street, Blackburn, Lancashire, BB1 3BD
(Sat Nav Postcode: BB1 3AE map overleaf)

Time: 9.30 - 12.00 (tea and coffee available from 9.00am).

SYSTEMS AND COMPONENTS

Learn about the ROI gained by Dunlop Systems and Components and see how it was calculated by the production engineering team. Listen to the real-life examples and then develop your own ROI.

See how easy it is to use the Eiger software, which comes free with every machine. Bring your own components along as an .STL file and try them

Watch Us Print Composite Parts That Are 'Stronger than Aluminium'

Learn how to:

- Cut manufacturing costs
- Reduce lead times
- Free up CNC machines
- Create new business opportunities
- Calculate an ROI on 3D printing.

Hear about Metal 3D Printing

Learn about the new affordable metal solution available from Markforged. Find out more about the new materials being released through 2019 and learn how to spot metal printing opportunities inside your business.

Bring your own .STL files

Find out how to create an account for yourself in Eiger, the complementary Markforged software that accompanies every machine. Load your own files in to the software and quickly create composite printed parts. Generate accurate part costs & run times to help with your ROI.

Meet the Team

Meet the team at Mark3D UK and chat to the experts from Markforged. Talk to them about your printing needs for the future and hear about what's new in the market place. Ask questions about the product range and learn tips and tricks.
